Continuation of Substance of Interview including description of the general nature of what was discussed: The examiner called Mr. Hooker to discuss issues regarding claims 1 and 22 in regards to Bailey et al (specifically figure 4) as the reference shows an extrusion head having two outlet ports wherein port 39 extends partly beyond port 39a. The examiner gave Mr. Hooker the patent number and specifically referenced figure 4. Mr. Hooker called the examiner back and suggested amendments to claims 1 and 22. The changes are shown in the attached examiner's amendment. The examiner agreed that the proposed amendments would overcome the reference. Mr. Hooker also proposed voluntarily amendments to correct claim informalities in claims 27, 28, 32 and 33. It was agreed that the proposed changes would be made by examiner's amendment..
